

## **Project Summary**

The aim of my project is to design and develop an HTML-based website which serves as a virtual gateway to the heart of the vibrant city of Wenzhou. It is a comprehensive exploration, showcasing Wenzhou's rich history, linguistic nuances, delectable cuisine, and economic dynamism, all illustrated in a user-friendly and engaging HTML website, which contains a wealth of information about Wenzhou. The city of Wenzhou is a beautiful city and I would like to see more people discover it and visit it. By encouraging more travelers to explore Wenzhou, we not only contribute to its thriving tourism industry but also foster cultural exchange, allowing visitors to witness firsthand the warmth of its people, the richness of its traditions, and the splendor of its landscapes.

The extras I used are iframes, Transitions & transformations Plugins and jQuery.
